AMENDMENTS TO THE ABSTRACT:

A foot water-spouting ~~jetting~~ device includes a foot-front water spouting ~~jetting~~ section for spouting ~~jetting~~ water toward the front side of a user's foot and a water-spouting ~~jetting~~ section direction moving mechanism for reciprocating the destination of water spouting ~~jetting~~ of the foot-front water spouting ~~jetting~~ section along a longitudinal direction of the foot. A plurality of spouts (~~jets~~) may be arranged side-by-side in the foot instep width direction for each of the right and left feet. The pressure of water spouting ~~jetting~~ at a water arrival point may be changed based on or the water spouting ~~jetting~~ amount may be changed based on movement of the water arrival point.
